

The 6th MCI Project weekly meeting will be held in **Ingkarni Wardli level 4** at **2:30 Pm** on **Tuesday 4 April 2017**.

Agenda

Chair: Tianxu Xi

1 Group members

- a1674472 Tianxu Xi
- a1692335 Changchang Liu

2 Apologies

None

3 Summary for last meeting

- We showed our work and progress.
- Some questions about how to design add button for trace table.
- Some questions about how to run gdb command by clicking one button on the page.
- Review our business case.

4 Summary for this meeting

Tianxu and Changchang will introduce the progress so far and future work in week6. In addition, we will check if our work is enough for the first milestone.

5 Our work and progress

- We have already finished establishment of login page and the connection with database. In addition, users can use correct username and password to login, and page will jump to corresponding pages.
- Basic student mode page has already been built. On the selectcode page, student can choose code from database and check the summary of code. On the tracetable page, student can add a new row in the trace table by clicking add button.
- The basic database has already been built.
- We can extract all variables by using gdb.
- Teacher mode has been built basically. Different parts have been arranged well on the different pages.

6 Questions

- How can we run gdb command by clicking one button on the page?

7 Work for this week

We will discuss how to build a perfect structure of database, how to compare the results with correct answers and still work on the establishment of teacher mode and student mode pages.

Note: Next meeting to be held on 11 April 2017.
