The *4th* MCI Project weekly meeting will be held in **Ingkarni Wardli level 4** at **2:30 Pm on Tuesday 21 March 2017**.

Agenda

Chair: Tianxu Xi

1   Group members

- a1674472 Tianxu Xi

- a1692335 Changchang Liu

2   Apologies

None

3   Summary for last meeting

- We have discussed with teachers how to use debugger to pick up all the variables and their values. Supervisor gave us some hints.

- Also, we asked how to use PHP to figure out the button problem (how to click multiple times.)

- Some questions about login interface and connecting database.

- A little introduction of pitch and how to change structure of our power-point.

4   Summary for this meeting

Tianxu and Changchang will introduce the progress so far and future work in week4. In addition, show the little introduction of pitch this week and how we changed power-point.

5   Pitch presentation and power-point structure

- Little summary about what we will introduce and who will introduce which parts

- Background will show audience why we need trace table.(because programming is hard and it is a good practice tool) The function and advantage of it.

- Introduction of this project will demonstrate clients the two modes of this tool and how to use it. Some examples will show clients for better understanding.

- Little introduction about current memory tracer.

- Significant advantages for our project, why it is better than the current memory tracer.

- Future improvement about how to make this tool bigger and more functional.

- Little conclusion about what we present.

6   Working on GDB

Changchang will introduce the progress about our work on GDB and show the achievements that we did.

7   Work for this week

We will work on database and how to connect it with the local file and the structure of the database.

Note: Next meeting to be held on 28 March 2017.
